Microsoft Certified Professional - ASP.NET

Jeffy Madari

AI First Leader | Enterprise Architect | Artificial Intelligence | Azure Cloud Solutions Architect | Cloud and AI Strategy in Healthcare | AI/ML Platforms | Gen AI & Agentic AI | Healthcare

Hyderabad, Telangana, India

Summary

I architect the future — at the intersection of Cloud, AI, and Enterprise Engineering. With 20+ years of experience across Enterprise Architecture, Cloud Transformation and AI-driven product delivery, I partner with business and technology leaders to turn complex challenges into scalable, resilient, and intelligent systems. As Associate Director of Architecture at Optum, I lead architecture strategy across the Prospective Portfolio — driving cloud-native modernization, governance, and AI adoption at enterprise scale. I've pioneered Kafka-based integration frameworks adopted enterprise-wide, led full Azure cloud migrations using the Well-Architected Framework, eliminated legacy licensing costs through re-architecture, and delivered 25–50% improvements in cloud cost and migration throughput. What I bring: → Enterprise & Solution Architecture (Azure, Cloud-Native, Distributed Systems, Event Driven) → Gen AI, Agentic AI & AI/ML Platform Strategy → Cloud Migration, Cost Optimization → DevSecOps, Governance & Engineering Excellence → Cross-functional Leadership & Technical Mentorship I believe great architecture is invisible — it enables the business to move fast, safely, and at scale. Open to conversations on enterprise architecture, AI strategy, and cloud transformation.

Experience

Optum (formerly Alere Wellbeing)

Principal Engineer, TLCP

March 2018 - Present (8 years 8 months)

Hyderabad, Telangana, India

As Associate Director of Architecture and integral member of Prospective Portfolio architecture team - Led architecture strategy, governance, and solution delivery across multiple tech assets as Associate Director/Principal Engineer

Architecture & Governance

Core member of Architecture Review Board, aligning technology decisions with business goals

Core member of Prospective Portfolio rearchitecture aligning with business capabilities

Shaped portfolio-wide architecture vision — re-architecting assets along domain boundaries, consolidating 2+ tech assets, and driving enterprise solution reuse

Implemented governance processes enforcing data integrity, security compliance, and engineering best practices

Mentored senior architects and technical teams, fostering a high-performance culture

Key Deliveries

App Gateway — Architected and delivered a unified entry point to the Prospective cloud across all portfolio tech assets

OQM System — Pioneered a Kafka-based high-throughput integration design, adopted as the enterprise integration backbone; defined SLAs for all services

Field Assist — Led full Azure cloud migration applying Well-Architected Framework; designed cost optimization, monitoring, and security strategy; eliminated Salesforce licensing costs entirely

Pulse — Architected data flows, cross-asset integrations, program workflows, and end-to-end DevSecOps strategy leveraging enterprise frameworks and libraries

ValueLabs

Enterprise Architect

July 2016 - October 2017 (1 year 4 months)

Hyderabad Area, India

Led product architecture and engineering delivery as Enterprise Architect and Dev Manager, building a team of 13 engineers including Senior Tech Leads. Drove cloud-native transformation, scalability, and quality engineering across enterprise-grade MYOB product.

Architecture & System Design

Designed scalable back-end distributed systems applying cloud patterns — CQRS, Caching, Health Check Monitoring, Competing Consumers, and Stateless Services — to enable horizontal scaling

Translated solution architecture into physical requirements, accounting for load, volume, and business continuity
Drove legacy-to-cloud migration strategy, improving ledger migration throughput by 50%

Engineering & DevOps
Streamlined CI/CD lifecycle using TeamCity, reducing product delivery turnaround time
Integrated telemetry data into a Common Data Lake, enabling enterprise-wide analytics and insights

Quality & Incident Management
Managed high-severity production incidents, ensuring minimal downtime and business impact
Converted code-level quality and performance gaps into prioritized Technical Debt items by quantifying business impact

Stakeholder Collaboration
Partnered with product teams to assess feature feasibility and propose architecture alternatives
Defined SLA frameworks for production incidents, aligning stakeholders across organizational levels

Tech Vedika
Principal Architect
April 2010 - June 2017 (7 years 3 months)
Hyderabad, Telangana, India

Owned end-to-end technology leadership, defining and executing the technology roadmap while architecting and delivering enterprise-grade solutions across cloud, mobility, ecommerce, and data platforms.

Architecture & Solution Delivery
Architected and delivered a highly scalable, highly available ecommerce platform for eyewear retail on Azure, applying cloud design patterns for horizontal scaling
Designed and developed an ETL framework for Big Data, enabling backup and archival capabilities across heterogeneous data sources
Delivered enterprise software solutions across the full Microsoft stack for large-scale enterprise customers

Mobility & ERP Integration

Architected, designed, and delivered an end-to-end mobility solution for DP World on iOS, Android, and Windows Mobile, integrated with Oracle Apps SSHR (ERP), using Java stack

DevOps & Delivery Transformation

Managed offshore product development team for an accounting product, driving critical enhancements and reducing delivery cycle time by introducing DevOps practices and full test automation

Leadership & Mentorship

Defined technology roadmap and provided complete technology leadership across the organization

Mentored engineers for growth in current and future roles through structured technical sessions on Cloud Computing and Azure, in collaboration with technology leaders

Mahindra Satyam

Technical Architect

March 2005 - April 2010 (5 years 2 months)

Delivered solution architecture, enterprise tooling, and application modernization initiatives across the organization in alignment with CTO-office strategy.

Key Contributions

Built a CTO-initiated developer workbench using Microsoft technologies — a framework enabling new and existing projects to adopt engineering best practices via Guidance Packages

Provided solution architecture and design across multiple concurrent projects organization-wide

Designed and delivered a Service Performance Dashboard giving business stakeholders visibility into the organization's complete service offerings across global geographies

Architected and developed a License & Product Management platform for a Microsoft OEM client, re-engineering legacy systems onto a modern Microsoft technology stack in direct collaboration with Microsoft

Patni Computer Services

Sr. Software Engineer

May 2004 - February 2005 (10 months)

Worked on the Language Management system product called Berlitz as .NET developer

Orient Information Technology
Sr. Software Engineer
October 2003 - May 2004 (8 months)

Worked as a .NET developer for inventory management system

Eleazar Intellects
Sr. Software Engineer
January 2000 - October 2003 (3 years 10 months)

Worked as .NET developer for multiple web based ASP.NET projects

Education

University of Mumbai
BCom, Accounting · (1996 - 1999)

Our Lady of Good Counsel High School
SSC · (1989 - 1994)
